## RECLASSIFICATION OF FM FACILITIES PURSUANT TO BC DOCKET 80-90

In the Report and Order in BC Docket 80-90, 94 FCC2d 152 (1983), the Commission specified a minimum transmitting antenna height above average terrain (HAAT) of 300 meters and a minimum effective radiated power (ERP) of 100 kW for class 'C' facilities. The Report and Order also specified that class 'B' facilities have an ERP which exceeds 25 kW. In order to provide existing stations an opportunity to meet these minimums, the Commission indicated that existing stations would have three years from the effective date of the Report and Order (i.e. March 1, 1984) to submit an application for appropriate minimum facilities or be reclassified. Thus, to avoid reclassification, an application proposing minimum class 'B' or 'C' facilities must have been received by March 1, 1987. Since, however, March 1, 1987, fell on a Sunday, the Commission has accepted applications to meet the class 'B' and 'C' minimums filed by the close of business on March 2, 1987, pursuant to 47 C.F.R. 1.4(i).

In a Public Notice released March 24, 1987, FCC 87-93, the Commission stated that it would prepare a list of reclassified facilities as soon as possible after March 2, 1987. The Attachment to this Public Notice consists of that list of reclassified facilities. Also included on the list are additional allotments and assignments which will be subsequently reclassified should their applications to meet the minimum class 'B' or 'C' facilities be returned or dismissed and/or existing construction permits expire.

The list is arranged by allotment groups in order by channel number. Under each channel number, the allotment groups are ordered alphabetically by state and city. Each allotment group contains an allotment as it was classified prior to March 2, 1987 and any license, construction permit or application associated with the allotment as of the close of business on March 2, 1987. A group appears on the list if the class of any facility included in the group changes.

The new class of a license, construction permit, or application was determined from the listed ERP and HAAT values and the zone of the transmitter site. In most situations, the new class of the allotment itself was determined from the highest class specified for the license, construction permit or application listed in that allotment group. An Order amending the FM Tables of Allotments (Sections 73.202 and 73.505) pursuant to the Commission's Report and Order in BC Docket 80-90 will be issued as soon as possible. (See Public Notice, FCC 87-93, released March 24, 1987, which further explains how the Commission administered the reclassification process).

For some groups, the allotment channel was changed by a prior Rulemaking and this fact is so indicated. Therefore, some stations appear in two groups because they may still be operating on the old channel and have an application pending or construction permit for operation on the new channel.

Non-commercial educational facilities were also reclassified at the close of business on March 2, 1987, and are included on the list. However, groups for these facilities do not have an allotment associated with them unless they are located within the Mexican Border Area. The separation distance requirements between non-commercial educational facilities on channels 218, 219 and 220, non-commercial facilities separated in frequency by 10.6 or 10.8 MHz (53 or 54 channels) or non-commercial facilities in the Mexican border area and allotments or assignments on the non-reserved channels will be based on these new classifications and the distance obtained from Table A, B, or C of Section 73.207 of the Commission's Rules. For other non-commercial educational facilities, the reclassification was for administrative purposes only.

The class change for any license, construction permit, or application indicated on the attached list constitutes a modification of that facilities' authorization by the Commission. Any errors detected in this list should be brought to our attention immediately. Reclassified facilities will not be issued a new authorization solely because of reclassification. When a new authorization is issued for any reason, the new class will appear.

The inclusion on this list of any application, construction permit, or license is only for the purpose of determining the class of the allotment or assignment, and does not constitute a determination on the merits of any matter concerning an application, construction permit, license or allotment that may be pending before the Commission. These situations include, but are not limited to:

- (1) Applications which have not yet been found sufficient for tender or acceptable for filing are included on the list. Inclusion on the list does not mean that the application is either tenderable or acceptable.
- (2) Applications which have been returned and for which petitions for reconsideration are pending are included on the list. The inclusion on the list does not mean that the petition for reconsideration has been granted; rather, it means only that the application will have the listed class if the petition for reconsideration is granted.

(3) Applications which include waiver requests not to reclassify the allotment are included on the list. The class of the allotment group has not been changed because of these requests. This does not mean that the waiver of reclassification has been granted; rather, it means that the allotment class will remain the same pending action on the waiver request.

(4) Construction permits which have expired but have applications for reinstatement pending are included on the list. The inclusion on the list does not mean that the construction permit has been reinstated; rather, it means only that the construction permit will have the listed class if the construction permit is reinstated.

(5) Licenses for which renewals have not been granted are included on the list. The inclusion on the list does not mean that the renewal has been granted; rather, it means only that the license will have the listed class if the renewal is granted.

The Attachment to this Public Notice is available for inspection in the Commission's Public Reference Room, Room 239, 1919 M St. N.W., Washington, D.C.

Questions regarding this Public Notice or the attached list should be directed to Gary Kalagian (202) 632-2049 or John Boursy (202) 634-6315.
